

## **ENERGY MANAGEMENT POLICY**

Product of the knowledge of the problems of the industrial, infrastructures and services sectors, COMSA Corporación is aware of the great problem that exists due to the availability of energy resources and the increasing cost of energy, as well as its influence on the cost structure of companies, increasingly relevant.

In order to be a proactive organization and an example for other companies in the sector in the field of energy efficiency, COMSA Corporación has implemented an Energy Management System and assumes the following commitments in coordination with the global strategy of the company:

- Ensure continuous improvement of its energy performance.
- Guarantee the continuous improvement of activities in terms of energy efficiency, and in the search for the application of alternative and renewable energies on the market. Promote the "Green Purchase" of energy efficient equipment and facilities.
- Consider energy performance improvement options when designing, within the defined scope, new installations, modifications to existing ones, equipment or systems renovations.
- Encourage the participation of company staff, contributing to the improvement of the energy management system. Promote best energy management practices and reinforce good energy saving behaviors.
- Comply with applicable legal requirements and other requirements related to the use and consumption of energy and energy efficiency.
- Establish objectives and goals with the aim of improving energy efficiency, ensuring the availability of information and resources necessary for its achievement.
